Toyama City Tsunami Hazard Map

8 Mizuhashi Seibu/Sango Surroundings (Detailed area map)

"Have a proper familiarity with tsunamis and be prepared for when one comes."

This Toyama City Tsunami Hazard Map was prepared based on the results of a survey on assumed flooding by tsunamis conducted by the Toyama Prefectural Government in 2016. It shows flooding situations caused by maximum-level tsunamis that may occur in the future, evacuation sites and directions, and other relevant information.

How to Evacuate from a Tsunami

A shift in the seabed during an earthquake triggers a vertical shock in the sea water, resulting in a tsunami.Do not wait until after a tsunami comes to evacuate. Please do so as soon as you feel shaking.

Following If you are unable to go about your daily life in your home, please relocate to a city-designated evacuation site.
