

# Landslide Hazard Map

Toyama City ⑧ Yamada Area Chubu / Nambu District

### If you observe signs of landslide.

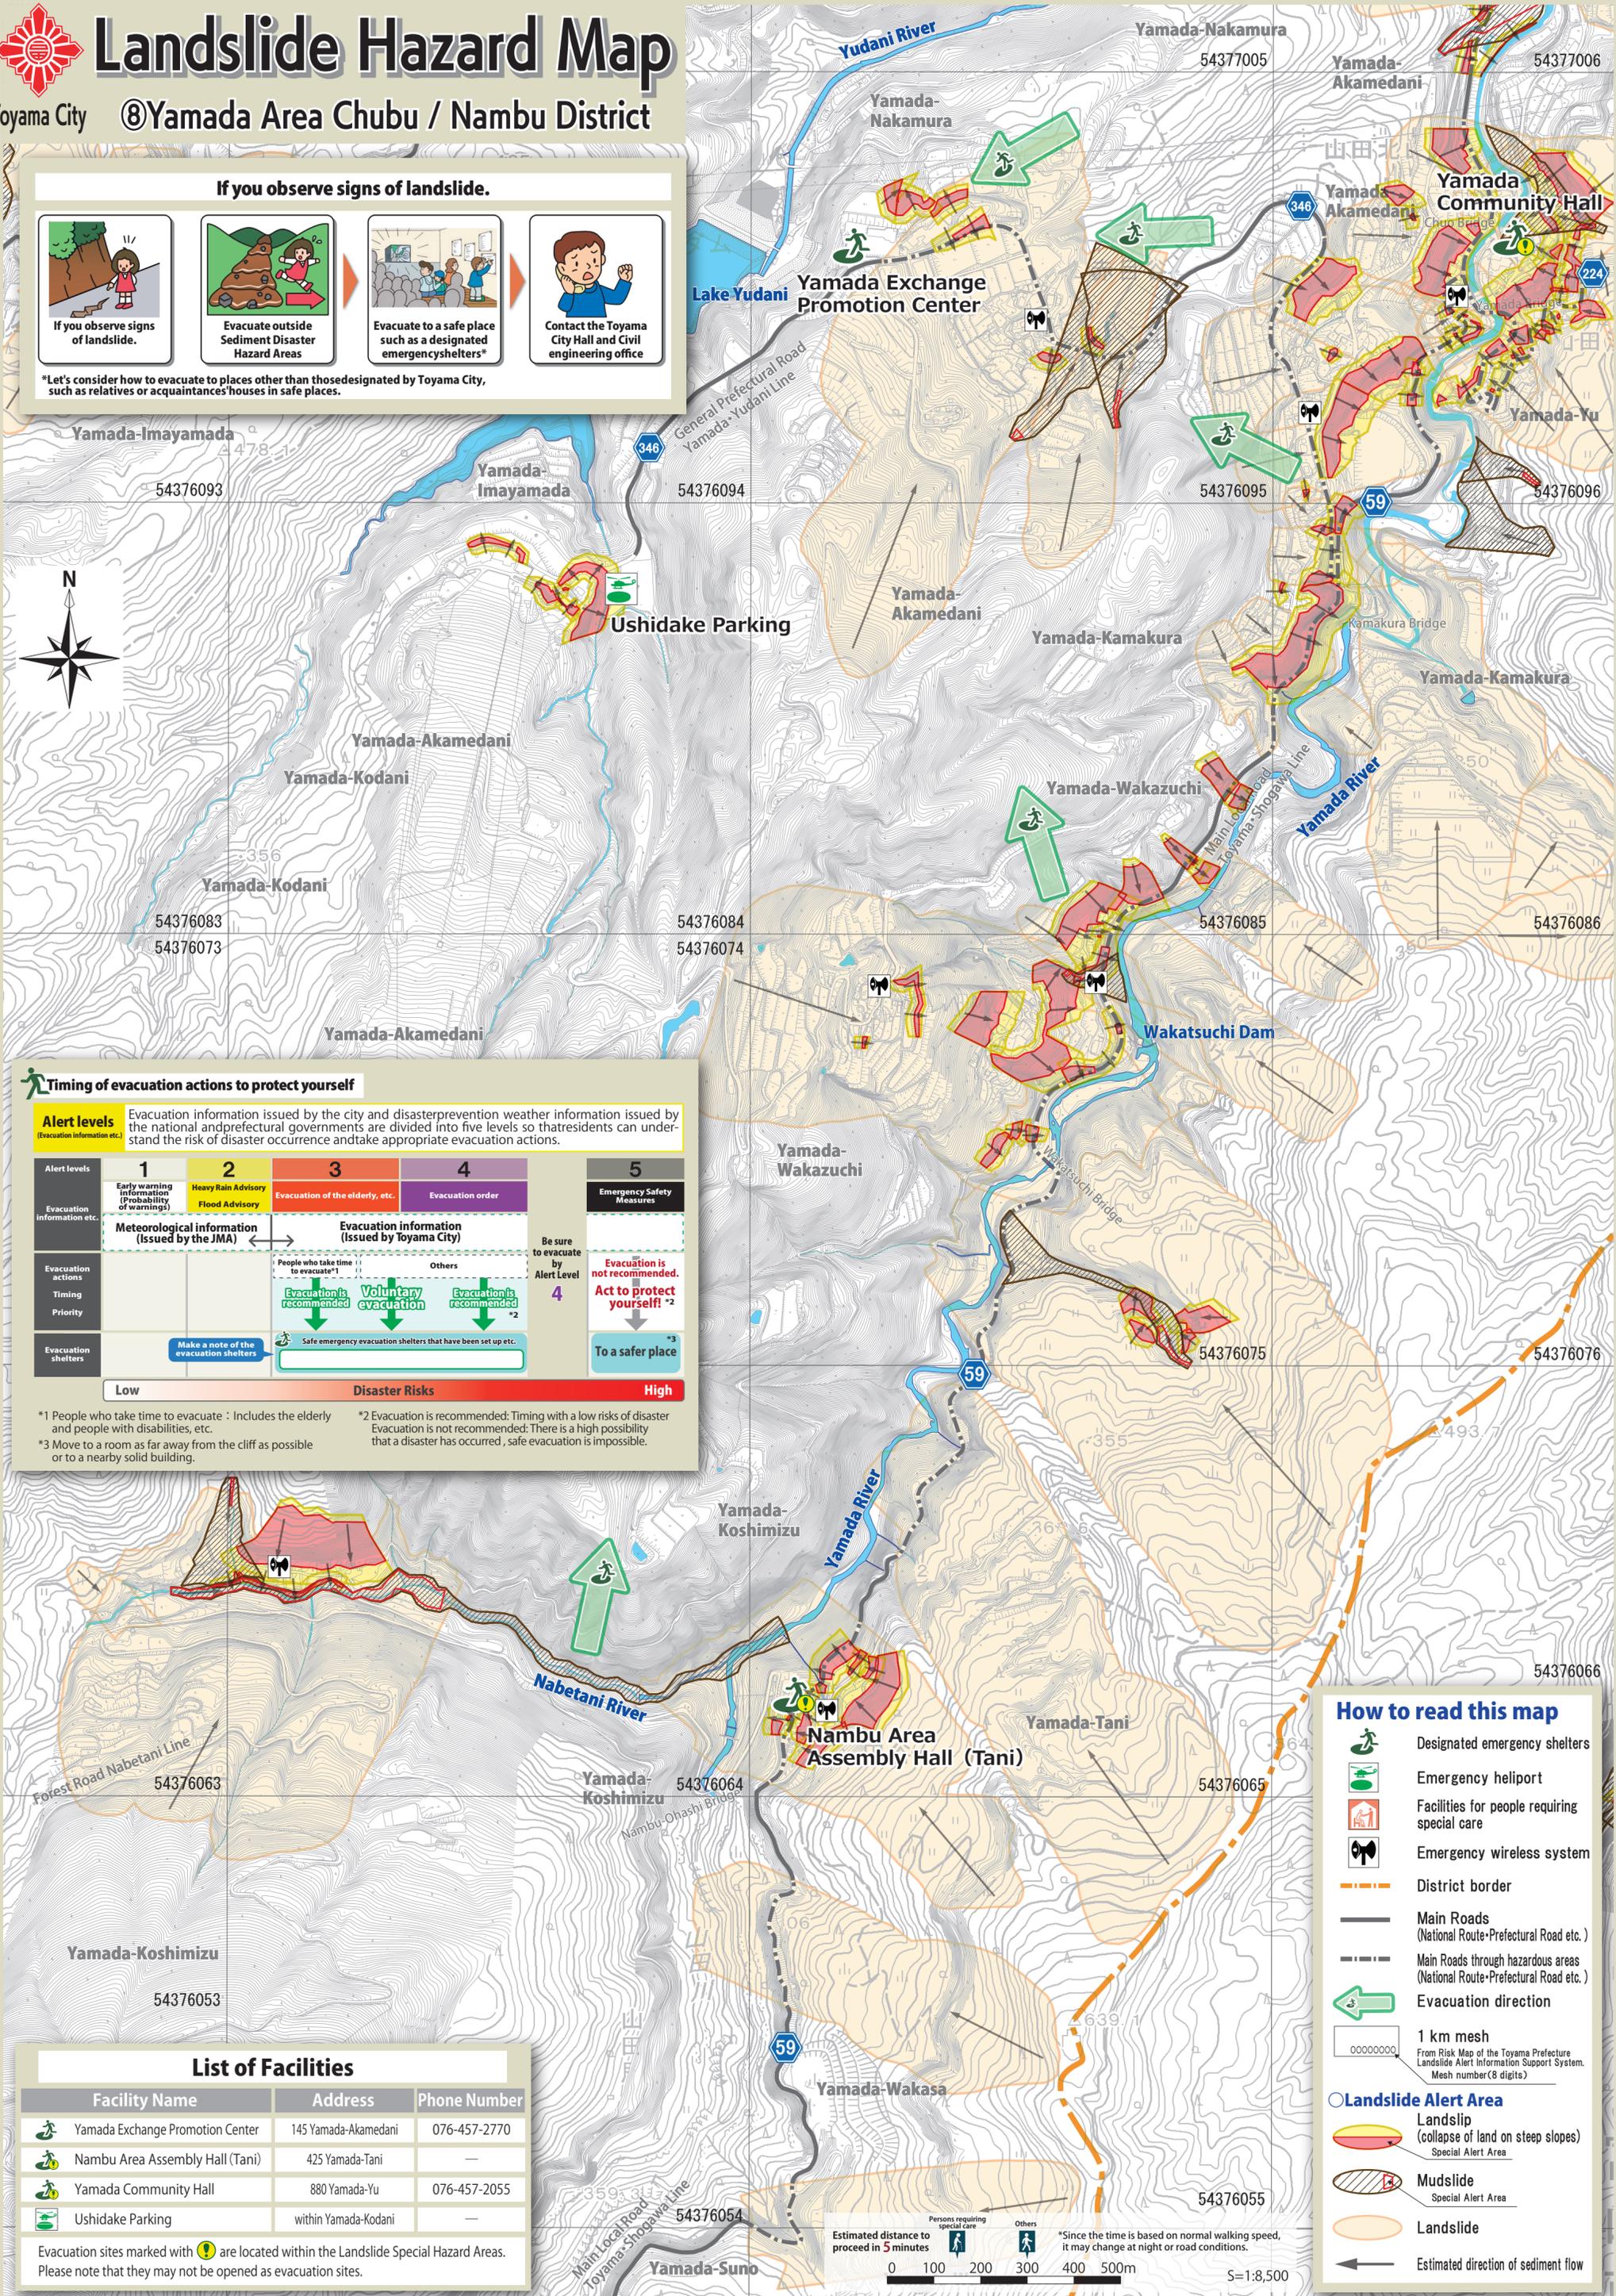

**If you observe signs of landslide.**

**Evacuate outside Sediment Disaster Hazard Areas**

**Evacuate to a safe place such as a designated emergency shelters\***

**Contact the Toyama City Hall and Civil engineering office**

\*Let's consider how to evacuate to places other than those designated by Toyama City, such as relatives or acquaintances' houses in safe places.

### Timing of evacuation actions to protect yourself

Evacuation information issued by the city and disaster prevention weather information issued by the national and prefectural governments are divided into five levels so that residents can understand the risk of disaster occurrence and take appropriate evacuation actions.

Alert levels	1	2	3	4	5
Alert levels	Early warning information (Probability of warnings)	Heavy Rain Advisory / Flood Advisory	Evacuation of the elderly, etc.	Evacuation order	Emergency Safety Measures
Evacuation information etc.	Meteorological information (Issued by the JMA)		Evacuation information (Issued by Toyama City)		
Evacuation actions			Evacuation is recommended	Evacuation is recommended	Evacuation is not recommended.
Timing			Evacuation is recommended	Evacuation is recommended	Act to protect yourself!
Priority			Evacuation is recommended	Evacuation is recommended	Act to protect yourself!
Evacuation shelters	Make a note of the evacuation shelters		To a safer place		
	Low		Disaster Risks		High

\*1 People who take time to evacuate: Includes the elderly and people with disabilities, etc.

\*2 Evacuation is recommended: Timing with a low risks of disaster. Evacuation is not recommended: There is a high possibility that a disaster has occurred, safe evacuation is impossible.

\*3 Move to a room as far away from the cliff as possible or to a nearby solid building.

### How to read this map

- Designated emergency shelters
- Emergency heliport
- Facilities for people requiring special care
- Emergency wireless system
- District border
- Main Roads (National Route-Prefectural Road etc.)
- Main Roads through hazardous areas (National Route-Prefectural Road etc.)
- Evacuation direction
- 1 km mesh (From Risk Map of the Toyama Prefecture Landslide Alert Information Support System. Mesh number (8 digits))

### Landslide Alert Area

- Landslip (collapse of land on steep slopes) Special Alert Area
- Mudslide Special Alert Area
- Landslide
- Estimated direction of sediment flow

### List of Facilities

Facility Name	Address	Phone Number
